Paraguay gravitricity ltd

Edinburgh-based energy start-up Gravitricity has unveiled plans to transform disused mine shafts into hi-tech green energy generation facilities through a system that uses gravity and massive weights.

Gravitricity - Provider of gravity-based energy storage system. Raised a total funding of $4.98M over 8 rounds from 30 investors. Valued at $17.5M. Founded by Charlie Blair, Martin Wright and 1 other in the year 2011. Gravitricity has 5 competitors.

In Gravitricity Ltd"s UK patent GB 2 585 124 B the energy storage system is said to enable a "gravity-based energy storage to have a significantly larger capacity in a single shaft for given capital cost and thus an improved cost per unit energy for large scale energy."

At Gravitricity we have a dynamic and skilled team of highly capable individuals. Their real power is how they work as a team, get to the heart of engineering challenges and find optimal solutions. Each team member is aligned to our ambitious mission to accelerate the global transition to 100% renewable energy and cares passionately about the ...

At Gravitricity we are developing a novel storage technology which offers some of the best characteristics of lithium batteries and pumped storage. Ideally suited to network-constrained users and operators, distribution networks and major power users, the technology operates in the 1MW to 20 MW power range and enables existing grid ...
