# Portugal pv system for home

Your goal, therefore, is to try to use as much solar energy as possible in your home, powering your devices. There are two dovetailed approaches that you can take to achieve this goal: Get a system that is well-sized for your home, and; ...

In previous articles we dealt with the options of going "off-grid" or staying "grid-connected", and the options between systems with or without batteries. Once this is defined, we can finally start specifying what is required ...

By harnessing the unlimited power of the sun, our Photovoltaic systems offer numerous benefits. Not only do they significantly reduce your carbon footprint, but they also provide long-term savings by slashing your electricity costs. Imagine the freedom of generating your own clean energy while contributing to a greener future.

In previous articles we dealt with the options of going "off-grid" or staying "grid-connected", and the options between systems with or without batteries. Once this is defined, we can finally start specifying what is required and possible for installation.& nbsp;

Have you considered installing a photovoltaic system? Are you feeling overwhelmed by the process of choosing the right system or understanding what best suits your needs? Let us guide you through this process smoothly, without any headaches or surprises.

A robust, asbestos-free roof covering and a roof surface that is as shadow-free as possible are essential requirements. For a PV system, a roof pitch of 30 degrees and a south-facing orientation are optimal. A solar system"s ability to produce power can be diminished by up to 10% by inclinations of less than 25 degrees or more than 60 degrees.
