Project PowerUp is the story of how Cisco Talos worked with a multi-national, multi-company coalition of volunteers and experts to help "keep the lights on" in Ukraine, by injecting a measure of stability in Ukraine"s power transmission grid.

This paper explores grid solutions that can contribute to improving the security of the electricity supply in Ukraine. The focus is on actions that help to meet the power demand of the country in the next two winters. The energy crisis in Ukraine urges practical steps to foster stronger electricity links between Ukraine and its Western neighbours.

Our goal is to raise funds for building renewable solar power solutions for critically hit and damaged schools in Ukraine. This will help them operate through Ukraine"s energy crisis due to the constant shelling of power stations, as well as create a solid foundation for using Green energy moving forward. This effort is in support...
