The iGyro 3xtra ushers in the second generation of the iGyro family. The new iGyro 3xtra boasts a completely revised regulatory algorithm and set-up procedure, expanded features and enormously enhanced performance, making it the new "State of the Art".. In contrast to its predecessor - the 3e - the new iGyro no longer incorporates delta and V-tail mixers.

Powerbox systems Samoa

The menu system is clearly and logically laid out, and includes many new functions as well as the familiar menu points - and all in two languages: German and English! Important new features implemented in the new Competition SR2 include the most efficient and sophisticated iGyro technology ever developed by PowerBox-Systems.

The PowerBox Royal SR2 once again sets new technical standards, offering a convincing array of features which until now have been the exclusive preserve of professional aviation. P² servo bus, 26 channels, 12-axis gyro, two pairs of regulators and a full-color screen - these are just a few of the technical refinements which the PowerBox Royal SR2 offers the ambitious pilot.

The basic requirement for dealer status is a minimum order value of the initial order of 1,500 EUR (net) and minimum net turnover of 2,500 EUR / financial year, coupled with purchasing in accordance with dealer terms.If this level of turnover is not achieved in the current financial year, a re-assessment must be carried out for the dealer to be included in our distribution system.

The PowerBox Pioneer is the latest development of a 14-channel power supply unit without voltage regulation, designed for HV servos. Since the unit has no voltage regulators, nor the large heat-sink surfaces required for them, it offers ...

Powerbox Systems Americas is the exclusive distributor of Powerbox Systems products in the entire Americas! Since the company"s foundation, PowerBox-Systems GmbH has set the standard for modern, secure power supply systems for use in models. Now also the most advanced transmitters in the industry with the CORE and the

The benchmark for modern power supply. The PowerBox systems set standards for modern power supplies in model aircraft. Our systems have been used successfully by ambitious pilots since June 2001. Our PowerBox battery backers are far more than just redundant dual power supplies or electronic on/off switches. In recent years, many technical innovations have ...

The PowerBox Pioneer is the latest development of a 14-channel power supply unit without voltage regulation, designed for HV servos. Since the unit has no voltage regulators, nor the large heat-sink surfaces required for them, it offers ultra-compact dimensions. Even so, the Pioneer still provides redundancy, as is the standard for all power supply units made by PowerBox-Systems.
