Electrification and hybrid solutions are now booming. The German energy storage manufacturer QINOUS GmbH was one of the first Danfoss customers developing these solutions long ago, before this was a "hot topic" in the energy industry.

QINOUS integrates intelligent battery storage solutions (ESS) into energy systems worldwide. The storage solutions are equipped with a micro-grid and energy management system (MEMS) and are therefore suitable for both grid-connected (on-grid) and off-grid applications with a capacity of 30 kilowatts (kW) up to several megawatts (MW).
