Recowatt co ltd Dominican Republic

The energy deficit and dependence on fossil fuels drove the Dominican Republic to step up its commitment to clean energy. DOMINION took on the task of building the photovoltaic plant in this Caribbean country, with an offer that included everything from the design and construction of the plant to its operation and subsequent maintenance.

Abundant natural resources: The Dominican Republic has high potential in solar, wind, hydroelectric, and biomass energy, offering various opportunities for renewable energy projects. Favorable incentives and policies: The Dominican government has implemented a series of tax incentives and support policies to encourage investment in renewable ...
