They don"t need direct sunlight to work and will still produce some energy on a cloudy day. Solar electricity is a green, renewable energy and doesn"t release any pollutants. There are various opportunities available. Solar Panels Solar Photovoltaic (PV) Solar PV uses energy from the sun to produce electricity.

Energy in Uruguay describes energy and electricity production, consumption and import in Uruguay. As part of climate mitigation measures and an energy transformation, Uruguay has converted over 98% of its electrical grid to sustainable energy sources (primarily solar, wind, and hydro). Fossil fuels are primarily imported into Uruguay for transportation, industrial uses and applicat...

Uruguay: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
