Renovo solar Estonia

How many MW of solar power are there in Estonia?
Since 2020 we have completed development and construction of more than 62MWof solar capacity. We have more than 744MW of ongoing projects around Estonia in different municipalities which will be completed by the end of 2024. We are also working to incorporate storage systems to provide electricity when the sun is not shining.

How much solar power does Estonia have in 2022?
That makes another record-breaking year for solar on the continent,with a total of 10 GW more capacity added than expected. Regarding solar power per capita,Estonia has emerged as one of the new leaders. The country is ranked 6th among 27 EU members,with 596 Watt per capitain 2022,jumping from 405 in 2021.

Does Estonia have a good energy policy?
So far, it has been a key objective of Estonian energy policy. Being a Nordic country with less sunlight than in Western and Southern Europe, Estonia has achieved a solid place at the top with its 1,923 sunny hours in the year.

Does Estonia have a lot of Sun?
Estonia actually has the same amount of sunshine as northern Germany or northern France,the payback period is mostly based on the local electricity price and the background system,' says Helen Anijalg. Therefore,to claim that Nordic countries have no sun is not true!
