Rts energy Benin

What is Benin's current energy situation?

This section provides information on Benin's current energy situation with energy demand-and-supply scenarios. According to the International Renewable Energy Agency (IRENA), 41% of Benin's population currently have access to electricity.

Why is Benin reliant on electricity imports?

Benin is reliant on electricity imports for a significant share of its energy supply. Reform programmes,including plans for electrification,have been put in place in the country,where only 30% of the population had access to electricity in 2017.

How affordable is electricity in Benin?

In 2019,in terms of the affordability of electricity for consumers,Benin obtained a score of 81 out of 100compared with the average value,which is 77.25 out of 100 . The government of Benin plans to continue its efforts to make electricity accessible to the population and ensure energy self-sufficiency .

What is the energy sector strategy in Benin?

In Benin,the energy sector strategy is aimed at improving the energy independenceof the country and diversifying its sources of supply through the implementation of various interconnection projects with neighbouring countries and the enhancement of the national RE potential.

How can bioenergy contribute to the energy sector in Benin?

In addition, the Vossa hydroelectric power plant of 60.2 MW is to be built with an annual production capacity of 188.2 GWh. An additional hydroelectric plant is planned to be installed in Bétérou to increase the national electricity production in Benin . Bioenergy can also play a crucial role in the energy sector in Benin.

What are the different types of energy transformation in Benin?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Benin for 2022. Another important form of transformation is the generation of electricity.

This planned switch off will affect customers from all energy suppliers, not just Good Energy. After this switch off, RTS meters will stop functioning properly, which might leave households unable to switch between peak and off-peak rates - and in some cases without heating and hot water. If you think you have an RTS meter, please don"t worry.
