What was the Dominican power sector like before the 1990s?

Prior to the 1990s reform,the Dominican power sector was in the hands of the state-owned,vertically-integrated Corporación Dominicana de Electricidad(CDE). The operation of the company was characterized by large energy losses,poor bill collection and deficient operation and maintenance.

Who is Sabson?

SABSON is considered one of the most important trading core of Southern and eastern Provinces,being the pioneers in establishing intermediate Cement Industry in Mukalla &Aden. Addition to the above mentioned,we are one of the biggest leading importers &distributors in Yemen in the following fields.

Why is the electricity sector in the Dominican Republic in crisis?

As previously described, the precarious situation of the electricity sector in the Dominican Republic is not caused primarily by limited generation capacity. Although a reduction of losses may provide a more economic way of resolving the crisis, there are plans for significant new investments in new generation capacity, especially in hydropower.

How is electricity generated in the Dominican Republic?

Electricity generation in the Dominican Republic is dominated by thermal units fired mostly by imported oil or gas (or liquefied natural gas). At the end of 2006,total installed capacity of public utilities was 3,394 MW,of which 86% was fossil fuels and 14% was hydroelectric. The detailed share for the different sources is as follows:

Why is service quality deteriorating in the Dominican Republic?

Service quality in the Dominican Republic has suffered a steady deterioration since the 1980s. Frequent and prolonged blackouts result mainly from financial causes(i.e. high system losses and low bill collection) that are further aggravated by technical factors (i.e. unadequate investments in transmission and distribution).
