Could teleconnections affect solar farms in the Sahara Desert?

Large-scale photovoltaic solar farms envisioned over the Sahara desert can meet the world's energy demand while increasing regional rainfall and vegetation cover. However,adverse remote effects resulting from atmospheric teleconnections could offset such regional benefits.

Can large-scale solar farms influence atmospheric circulation in the Sahara Desert?

Our Earth system model simulations show that the envisioned large-scale solar farms in the Sahara Desert,if covering 20% or more of the area,can significantly influence atmospheric circulationand further induce cloud fraction and RSDS changes (summarized in Fig. 7) across other regions and seasons.

Do Sahara solar farms affect global climate and vegetation cover?

However, by employing an advanced Earth-system model (coupled atmosphere, ocean, sea-ice, terrestrial ecosystem), we show the unintended remote effects of Sahara solar farms on global climate and vegetation cover through shifted atmospheric circulation.
