In modern solar setups, micro-inverters are gaining popularity. Micro-inverters installed 1:1 under each solar panel, convert direct current (DC) from the panels into usable Alternating Current (AC) for your home. This not only allows for independent panel operation but also minimizes the impact of shade on the system"s overall output.

Solar Panels: Each brand of solar panel product we use is a Tier1 Global Manufacturer. Our partners are Canadian Solar, Jinko, JAsolar, Q-cells Hanwha, REC, Silfab, Trina and Longi. Panels include a 12-30 Year product Warranty and a power guarantee of ...

Micro inverters, on the other hand, produce energy independently of their neighbouring solar panels. This makes micro inverter solar systems the more attractive option when it comes to combatting shaded areas or the impacts of low light. This is because only the covered panels" generation is compromised, as opposed to the entire system"s ...

Image: Enphase. Introduction. Micro-inverters and power optimisers are an upgrade on traditional PV system design, by maximising the electricity generated from each individual panel.They do this by shifting Maximum Power Point Tracking (MPPT) to the panel level. This is particularly beneficial on roofs with multiple orientations or shading, as the panels will have differing outputs.
