Skeleton technologies Honduras

Skeleton Technologies is an energy storage developer and manufacturer for AI data center, transportation, grid, and defence applications. Skeleton is developing a novel raw material, curved graphene, [1] to produce solutions for the energy storage market, including high-power supercapacitors .

Skeleton Technologies is the global leader in graphene-based ultracapacitors and energy-storage systems. We deliver high power, high energy, reliable and long-life storage solutions across the industry.

Skeleton Technologies is a company based in Harjumaa that specializes in the development and manufacturing of ultracapacitors, also known as supercapacitors. These energy storage devices are designed to provide high power density and rapid charge/discharge capabilities, making them ideal for a wide range of applications in various industries.

Skeleton Technologies is a provider of ultracapacitor-based energy storage. The company develops and manufactures graphene-based ultracapacitors cells and modules. It serves automotive, transportation, grid and renewables, maritime, and industrial manufacturing sectors.

Skeleton Technologies operates within the clean technology sector. The company specializes in developing and producing energy storage solutions that reduce CO2 emissions and save energy for automotive, transportation, grid, and industrial applications.

OverviewAboutHistoryIndustries and applicationsTechnologyFinancingSkeleton Technologies is an energy storage developer and manufacturer for AI data center, transportation, grid, and defence applications. Skeleton is developing a novel raw material, curved graphene, to produce solutions for the energy storage market, including high-power supercapacitors.

Skeleton"s SuperBattery technology is a fast-charging, high power battery technoloy, filling the technology gap between supercapacitors and batteries. SuperBatteries offering the ideal combination of energy, power, and safety for <30-minute applications.

Skeleton Technologies is a company based in Harjumaa that specializes in the development and manufacturing of ultracapacitors, also known as supercapacitors. These energy storage ...

Skeleton Technologies is the global leader in graphene-based ultracapacitors and energy-storage systems. We deliver high power, high energy, reliable and long-life storage solutions across ...
