Slovenia solar services

What is the potential of photovoltaic energy in Slovenia?
Slovenia offers great potentialfor exploiting photovoltaic energy due to evenly spread solar irradiation. The first photovoltaic power plant in Slovenia was set up in 2001. At the end of 2017,4,231 photovoltaic power plants had been installed in Slovenia with a total power of 267 MW.

Does Slovenia have solar power?
Per analysis published by the World Bank which considers natural features of a location such as altitude,humidity,cloud cover,and topography,Slovenia's solar PV potential is relatively low compared to global resources,but is comparable to that of other central and eastern European countries which lie north of the Alps.

Do solar power plants need a building permit in Slovenia?
Solar power plants with the maximum power of up to 1MW are,according to the Decree,considered small power plants and do not require a building permitto be installed. The Decree simplifies investing in renewables and is a welcome change as procedures for obtaining building permits in Slovenia can be time-consuming. 3.
