Solar company s a Haiti

Can solar energy be used effectively in Haiti?
Solar energy can be used effectively in Haiti,offering energy self-sufficiency to the most isolated cities in the absence of a power grid. The country's location in the tropics gives it very strong solar energy potential. It is believed that solar energy will play a fundamental role in access to electricity over the next 10 to 15 years.

Why is distributed solar PV the only energy source in Haiti?
Since only about 13% of the people even have grid access,distributed solar pv is the only energy source that can supply all the people electricity for now. Haiti has limited energy resources: no petroleum or gas resources,small hydroelectricity potential and rapidly declining supplies of wood fuels.

Is Haiti a solar power market?
Recently,many solar companies have seen Haiti as a huge market potential for solar energy. The founder of 10Power estimates that the potential solar power market is worth over $500 million. In 2013,the completion of Hôpital Universitaire de Mirebalais came to an end. This hospital is the largest solar-powered hospital in the world.
