Solar panel company inia Svalbard and Jan Mayen

Where are the world's northernmost solar panels installed?
Norway has installed the world's northernmost ground solar panels in its Svalbard archipelago,despite the region being plunged into darkness from early October until mid-February every year. Norway has installed the world's northernmost ground solar panels in its Svalbard archipelago,a region plunged in round-the-clock darkness all winter.

Could a new solar project help remote Arctic communities transition to green energy?
Norway has installed the world's northernmost ground solar panels in its Svalbard archipelago,a region plunged in round-the-clock darkness all winter. The pilot project could help remote Arctic communities transition to green energy.

Why do solar panels work in Isfjord Radio?
The solar panels also benefit from the "albedo" effect,the reflective power of snow and ice,as well as low temperatures that improve their efficiency. On the flipside,the region is plunged into total darkness from early October until mid-February,which makes it impossible for Isfjord Radio to completely give up fossil fuels.
