Three solar pumping stations are now set up and ready for commissioning. The new pumps will provide access to water and irrigation capacity to agricultural lands. Attention is being paid to the engagement of women, youth, and people with disabilities in the social management of water, particularly in the project areas that currently have no ...

Abstract: At the 2014 GHTC we reported on the design, shipping and installation of "A Solar-Pumped Domestic Water Supply for the Mountains of Rural Haiti" [1]. From the first delivery of water in January, 2014, through the present, the system has been used, maintained, repaired and altered by members of the local community.

A solar-powered water system has brought much-needed relief to communities in Haiti"s Fonds-Baptiste communal section. This hard-fought realization, which resulted from the unwavering will of the people supported by nonprofits FIDA/PCH, underscores a project that can be replicated throughout rural Haiti.

Abstract: At the 2014 GHTC we reported on the design, shipping and installation of "A Solar-Pumped Domestic Water Supply for the Mountains of Rural Haiti" [1]. From the first delivery of ...

In particular, he inaugurated a solar pumping system for the benefit of farmers in the Ti Dolan area 1st section

Pont Tamarin (Plaine des Gonaïves); a solar-powered AIZ4 SME in Basen Desous; pump 11 in the Plaine des Gonaïves and also the refurbishment of a pump in the locality of Tarasse, essential for watering the land and out of order for ...
