Solar systems harare Estonia

Why should you install solar panels in Estonia?
The energy productivity of solar panels installed in Estonia is equivalent to the southern countries,as Estonia's cooler climate increases the efficiency of solar panels. We offer our customers turnkey construction of a solar park,starting from the design to the connection point,the construction of substations.

How much solar radiation does Estonia produce a year?
In Estonia,the amount of solar radiation is comparable to Central Europe; the average amount of radiation has an optimal slope and azimuth of 1100-1200 kWh/m2,85% of which falls between April and October. An optimally installed 1 kW PV plant produces 900 to 1000 kWh of energy per year.

Who is the company Mysolar?
The main activity of the company is the sale and installation of solar panels. Company MySolar has been offering solar systems and project work for homeowners all over Estonia since 2015. The company is the sole representative of Italian and German panel brands in Estonia.
