Solar utility pro complete kit Finland

Paired with the Seaward Solar Survey 200R irradiance meter, it also captures irradiance, module, and ambient temperature data. The generous internal storage memory can accommodate up to 999 complete record sets, downloadable as a CSV file to a PC for analysis.

The new Solar Utility Pro from Seaward takes PV testing to the next level. With the introduction of more efficient 1500V modules and inverters, Seaward have answered the industry call for an easy to use and robust tester with 1500V ...

The new Solar Utility Pro from Seaward takes PV testing to the next level. With the introduction of more efficient 1500V modules and inverters, Seaward have answered the industry call for an easy to use and robust tester with 1500V capabilities.

To facilitate on-site testing, the Solar Utility Pro is bundled with 1.5-meter long conversion leads. These leads transform the standard MC4 connectors into convenient alligator clips. This feature proves particularly useful in scenarios involving combiner boxes and junction boxes.

Robust 1500V 40A solar PV string checker. Test multiple strings in parallel up to 1500V 40A; Test at a string level or in the combiner box; Record up to 999 full sets of string data; Test open circuit voltage (Voc), short circuit current (Isc), irradiance (W/m2), ambient temperature & more
