Solar works Spain

How much solar power does Spain have?
In 2008 the Spanish government committed to achieving a target of 12% of primary energy from renewable energy by 2010 and by 2020 expected the installed solar generating capacity of 10 GW. Since 2010,Spain has been the world's leader in concentrated solar power (CSP).

Is solar energy a good investment in Spain?
As you can see,solar energy has indisputable potential in Spain. Installing solar panels in Spain means significant financial savings from day one,making you the owner of your energy. Similarly,the use of renewable sources such as solar energy leads us to an energy model based on sustainability.

Why is solar energy growing in Spain?
This strong growth of solar energy in Spain is partly due to the world in which we currently live, increasingly concerned about energy savings and the increase in greenhouse gases in the atmosphere that are harmful to the environment.

Why should you install solar panels in Spain?
Installing solar panels in Spain means significant financial savingsfrom day one,making you the owner of your energy. Similarly,the use of renewable sources such as solar energy leads us to an energy model based on sustainability. You are putting aside fossil fuels to reduce pollution and curb climate change.

When will solar power be available in Spain?
In May 2017, Spain held an auction for new renewable capacity to be online by 2020. Solar projects won only 1 MW of the 3000 MW awarded. After complaints by the solar industry which felt the auction terms favoured wind power, another auction occurred in July.

What are the largest solar power plants in Spain?
As of November 2010, the largest PV power plants in Spain include the Olmedilla Photovoltaic Park (60 MW), Puertollano Photovoltaic Park (47.6 MW), Planta Solar La Magascona & La Magasquila (34.5 MW), Arnedo Solar Plant (34 MW), and Planta Solar Dulcinea (31.8 MW).

Solar in Spain has been active in renewable energy since 1999. So far, we have successfully completed over 3,000 projects and we have developed a really strong combination of experience and knowledge in the sector.

However, there is still a notorious lack of knowledge about the installation of solar panels and how the regulatory framework works in Spanish territory. Consequently, in this article, we will provide you with the necessary ...
