# Solenco powerbox price United Kingdom

What is a solenco Powerbox?

The Solenco Powerbox is a so-called µCHP (micro combined heat and power device) that supplies both electricity and heat. In most situations,the Powerbox alone will not provide sufficient heat output to heat up a building completely. That is why a connection with a heating system,eg a heat pump,is recommended.

How powerful is solenco vs Powerbox?

Solencowill be powerful to commercialize,since it has comparable cost to existing inferior solutions,and has the fastest return on investment (<3 years) of any storage solution on the market. Powerbox is targeted at the EU-28 residential renewable energy market of EUR33.6B (2016),which continues to grow rapidly.

Will the solenco Powerbox be a disruptive technology?

"I,doctor Nicolas Brahy,representing Hydrogen Europe,will support the developing of the Solenco Powerbox,since it can be seen as a disruptive technologyfor bringing more renewable energy in the European Energy mix and paving the way for introducing hydrogen technology in our daily live."

Voor alleen de Powerbox van Solenco van zeg 10 kW is al een bedrag van rond 20.000 euro nodig. Een concurrerend vergelijkbaar systeem van HPS, de Picea, kost EUR 54.000,- excl. btw. De claim van de fabrikant van de Powerbox als zou deze een rendement van 95% halen is ons inziens veel te optimistisch. Aan de in de zomer vrijkomende warmte bij de ...
