ELEO, the manufacturer of advanced battery systems, has announced plans to expand considerably with a new battery production plant at the Automotive Campus in Helmond. In the new facility, the annual battery production capacity increases tenfold to 500MWh - equivalent to approximately 10,000 battery packs.

Helmond-based startup Eleo has developed a solution. Electrification of heavy machinery such as excavators and combine harvesters is still in its infancy, largely because of the complexity and cost of the required battery packs.
