Will swappable batteries drive Thailand's '30@30' goal?
The swappable battery project is also driving the government's "30@30" goal of 30% zero-emission vehicles in Thailand by the year 2030, said Dr Pimpa Limthongkul, director of the Clean Energy Innovation Research Group at the National Energy Technology Centre (NTEC).

How long does it take to swap batteries in Thailand?
Therefore,the concept of battery swapping,where batteries can be quickly exchanged in about 5 minutes- the time it would take to refuel with gas - has emerged as a solution. However,turning that concept into reality is no easy task given the absence of a standard for swappable batteries and charging stations in Thailand.

What is a swappable battery pack?
The ongoing R&D project was launched to develop a standardised swappable battery pack format for electric motorcycles that will allow riders to easily switch their empty battery for a fully charged one.
