Stores electricity Namibia

Where does Namibia get its electricity from?
Namibia imports most of its electricity from South Africaand other countries in the region,namely Zimbabwe...So,what - if any energy and electricity - do we produce ourselves and how - thermal,hydro-power,solar,wind...etc.

Can I use my electric appliances in Namibia?
You can use your electric appliances in Namibia because the standard voltage (220 V) is the same as in the United Kingdom (230 V). Manufacturers take these small deviations into account.

Does Namibia import electricity from South Africa?
Currently,Namibia imports most of its electricityfrom South Africa and other countries in the region. A special arrangement between NamPower and Eskom,the South African Power utility,enables Namibia to buy and utilise the surplus energy from SA at affordable rates. Does Namibia have oil reserves?

What is the price of electricity in Namibia?
Namibia,September 2022: The price of electricity is 0.112 U.S. Dollar per kWhfor households and 0.000 U.S. Dollar for businesses which includes all components of the electricity bill such as the cost of power,distribution and taxes.

Who is responsible for electricity in Namibia?
For parties interested in pursuing investment opportunities,the Government of the Republic of Namibia,through the Ministry of Mines and Energy,is responsible for the power sector,and Namibian Power Corporation (NamPower)is responsible for the generation and transmission of electricity.

What are Namibia's alternative energy sources?
Namibia is left with no option but to look at alternative power generation sources much as the Kudu Gas-to-Power Project and the Epupa Baynes. In Namibia,NamPower buys electricity outside Namibia and sells inside the country and this has enabled them to obtain a better cost structure and readily available power supplies.
