Syria agam greenhouse energy systems

Agam Energy Systems Ltd is active in the area of energy conservation and environmental technologies. Based on more than 10 years know-how and experience in the field of heat exchange between air and hygroscopic brine, the company develops, manufactures and markets new and more efficient technologies and machines (all patented). The current products are ...

Agam"s technology enables air circulation with closed thermal screens & without roof ventilation, providing optimal and uniform humidity & temperature conditions, whilst dramatically reducing energy consumption and CO2 emission. Agam"s ...

AGAM Energy Systems Ltd. designs, develops and manufactures air conditioning and dehumidification systems. ... Greenhouse effects caused by these gases warm our planet thus endangering the existence of its inhabitants. Our goal is to reduce fuel consumption by introducing new and more efficent technologies and machines.

Hagai Palevsky with Agam Greenhouse Energy Systems stressed the dangers of excess humidity in greenhouses, which causes fungal spread, mildew, and other pathogens. The Ventilated Latent Heat Converter captures air with a salt solution and then filters it. This way, the greenhouse can be closed, saving energy. It also regulates temperature when ...

Greenhouse Energy. Agam"s Eco Climate Converter (ECC) is a unique, patented greenhouse dehumidification system. It is also known as a ventilated latent heat converter, designed to take excess humidity and convert it into heat and water by blowing air through a special hygroscopic brine in a compact cooling tower.

AGAM Greenhouse Energy Systems is proud to have our machines marketed to many agricultural growers around the world, and distributed by a network of hard-working... 2021 energy crisis - AGAM Greenhouse Energy Systems (published on HortiDaily)

AGAM Greenhouse Energy Systems - introductory slideshow. Click here to view the slideshow! Canada - Alberta Greenhouse Growers Newsletter. Click here to view the article! ... sales@agam-energy . Mailing address: 16 Arlozorov St. Hod HaSharon 4520316, Israel. ...

Find company research, competitor information, contact details & financial data for AGAM GREENHOUSE ENERGY SYSTEMS LTD of KIRYAT MALACHI, Southern District. Get the latest business insights from Dun & Bradstreet.

Syria agam greenhouse energy systems

AGAM Greenhouse Energy Systems developed their Ventilated Latent Heat Converter and Hybrid Air Conditioner system, offering a unique solution that might prove particularly handy in these times. "The systems employ a hygroscopic brine to dehumidify air in the growing facility while harnessing wasted thermal energy, giving the user a much higher ...

Agam Greenhouse Energy Systems develops micro-climate energy-conserving, dehumidification, heating, and cooling systems for the agricultural, horticultural, and cannabis industries. The company"s Ventilated Latent Heat Converter and Hybrid Air Condition are dehumidification systems for cold and warm climate greenhouses.

For AGAM Greenhouse, press here. AGAM is developing a proprietary Liquid Ring Rotating Casing Steam Turbine (LRRC ST) that can generate electricity from waste heat, starting at 90c hot water or 100c steam, currently thrown ...

Agam Greenhouse Energy Systems | 61 ?? ????????? ??? LinkedIn. dehumidification and filtration of airborne spores in greenhouses + dramatically reducing energy costs and CO? emission | Our technology enables air circulation with closed thermal screens or without window ventilation, providing optimal and uniform humidity and temperature conditions, whilst dramatically ...

screens. 2. The greenhouse that was equipped with a thermal screen only (GH 2) was constructed of impermeable, reflective sheeting that provided 50% shade. 3. A greenhouse equipped with a thermal screen and the Agam system (GH 3). The Agam system is based on a heat converter that can lower the RH in the greenhouse and supply the additional energy

Agam"s technology enables air circulation with closed thermal screens & without roof ventilation, providing optimal and uniform humidity & temperature conditions, whilst dramatically reducing energy consumption and CO2 emission. Agam"s systems use special hygroscopic brine that enables the conversion of humid air into dry air, reducing humidity ...

Founded in 2009 by industry veterans, Agam develops and produces innovative, energy-conserving and environmentally friendly cooling, heating and dehumidification systems. Agam`s solutions serve the needs of both the industrial and the agricultural sectors, including greenhouses, indoor cultivation and seed and grain warehouses.
