Thermax esp Iceland

What does Thermax do?

Thermax offers products,systems and solutions in energy and environment engineeringto Industrial and commercial establishments around the world. Its business expertise covers,heating,cooling,waste heat recovery,captive power,water treatment and recycling,air pollution control and waste management and performance chemicals.

Who is Thermax Enviro?

For more than 4 decades, Enviro has been a focal point entity for all industrial and utility sectors concerned to control particulate and gaseous emission Having an extensive engagement with diverse sectors and tie-ups with technology majors, Thermax Enviro commissions & executes turnkey projects from concept to commissioning.

Is Thermax a good company?

"Went for the first time last night for my Husbands Birthday, friendly staff, very tasty food, would highly recommend, we will be back." Thermax, a company in energy and environment since 1966 has set up its air pollution control business (Enviro division) in 1980 with the conviction that pollutants are inevitable but pollution is not.

How many people worked at Thermax?

Total erected weight was approximately 85,000 MT (metric tonnes),and insulation area close to 2,50,000 Sq. m. At its peak,the project had nearly 8000workmen at the sites. Safety was accorded the highest priority,with Thermax cumulatively logging in 27 million safe man-hours.

Why should you choose Thermax?

Having a proven track record in EPC, boiler manufacturing and O&M, which was a prerequisite by the customer, Thermax was able to complete the project whose scope comprised a 90 TPH boiler, 19.9 MW steam turbine generator and Balance of Plant systems.

How many boilers does Thermax produce?

Put together,the 21units produce 75 TPH steam at 18 bar (g) which is then fed into the steam turbine,to generate 13 MW of electricity. This is the highest number of boilers supplied by Thermax for a single project so far and was completed in a short span of nine months.

Thermax executed a 100% biomass fired cogeneration plant, deploying a 33 TPH hybrid water tube superheated bi-drum boiler with a reciprocating grate, designed at 67 kg/cm2 pressure and 450°C temperature, for the client. The boiler has been designed to run on a mix of biomass briquettes and loose biomass fuels to generate 4 MW power as well as ...
