To date, 2.3 million rooftop PV systems have been installed in Brazil, with the potential to install more than 90 million rooftop PV systems. In 2023, Brazil added more than 10GW of PV capacity, with a cumulative installed capacity of more than 37GW, making it the fourth largest in the world, behind China, the United States and India.

In Brazil, solar power is currently used in 99.9% of all distributed generation connections in the country, the remaining comprises of small hydroelectric and wind energy. Over 99% of those installed PV systems in distributed generation are micro and mini generation systems (those with up to 5MW capacity).

Just three years ago, Brazil did not feature among the world"s top producers of solar energy, but by 2023 it had risen to sixth place in the rankings. The pace of growth has been notable: since 2022, the country has ...

Founded in 2013, the Brazilian Solar Photovoltaic Energy Association (ABSOLAR) is a private, non-for-profit, trade association, which gathers companies from the entire value chain of the solar photovoltaic (PV) sector with operations in Brazil.

Panorama of solar photovoltaic in Brazil and in the world. ABSOLAR analyzes and consolidates monthly data from the Brazilian solar PV sector and releases an infographic with the scenario of solar energy in the country. Check the latest version below:

Just three years ago, Brazil did not feature among the world"s top producers of solar energy, but by 2023 it had risen to sixth place in the rankings. The pace of growth has been notable: since 2022, the country has added, on average, roughly one ...

The total installed solar power in Brazil was estimated at 48.2 GW at October 2024, which consists of about 20.2% of the country"s electricity matrix. [1] In 2023, Brazil was the 6th country in the world in terms of installed solar power capacity (37.4 GW). [2] Brazil expects to have 1.2 million solar power generation

systems in the year 2024. [3]
