ECO STOR"s system significantly cuts the cost of small-scale energy storage. The solution also reduces the life-cycle carbon emissions of EV batteries and creates a circular economy for them. "EV batteries start out with high CO2 emissions because of the way they are produced, especially in Asia," explains Burchardt.

Mit einem brandneuen Online-Rechner der ECO STOR GmbH kann sich jeder selbst mit diesen wichtigen Fragen auseinandersetzen und zukünftige Modelle und Szenarien für das deutsche Stromnetz sozusagen live testen. ECO STOR hat dieses Tool entwickelt und stellt es nun kostenlos der Allgemeinheit zur Verfügung.

To provide an affordable energy solution, ECO STOR enables the use of "second life" electric vehicle batteries as energy storage. The proprietary system introduces a complete solution for developers, builders and homeowners looking for low cost, and energy efficient buildings.

X-ELIO CEO Lluís Noguera stated: "We are impressed by the position ECO STOR has built in Germany over a very short time. The capabilities and expertise of the ECO STOR team are very complementary to X-ELIO"s existing core competencies and I am certain this acquisition will accelerate the potential of both companies in the rapidly evolving energy ...
