Tunisia ensys renewable

What percentage of Tunisia's electricity is renewable?
In 2022,only 3%of Tunisia's electricity is generated from renewables,including hydroelectric,solar,and wind energy. While STEG continues to resist private investment in the sector,Parliament's 2015 energy law encourages IPPs in renewable energy technologies.

Is energy eficiency a key part of Tunisia's recovery plan?
Amid the coronavirus outbreak in early 2020,renewables and energy eficiencyhave become a key part of the country's recovery plans. Tunisia has witnessed growing deficits in its energy balance over the past two decades.

What are Tunisia's energy projects?
One third of the projects will be for wind farms and two thirds for solar photovoltaics. Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023.

Why does Tunisia have a deficit in its energy balance?
Tunisia has witnessed growing deficits in its energy balance over the past two decades. This trend is largely the result of increasing energy consumption in all economic sectors, coupled with the decline of hydrocarbon production.

Does Tunisia rely on natural gas?
The electricity generation mix is dominated by natural gas,while renewable energy resources represented only 3.0% in 2019. This strong dependence on natural gashas serious implications for Tunisia's energy security,since domestic production of gas has stagnated to the point of even declining in recent years.

What is the law relating to renewables in Tunisia?
The law relating to renewables in Tunisia (Law No 2015-12,the " Law ") as complemented by Decree No 2016-1123 and No 2020-105 (the " Decrees "),sets out the conditions and procedures for the implementation of projects for the production and sale of electricity from renewable energy sources.
