Overview. Visual Inspection of your Power Line Carrier Protective Spark Gap is now possible with the Model 350 Spark Gap Retrofit Module. Specifically designed to retrofit existing Line Tuner/Line Matching unit configurations that presently use gas tube arrestor devices.

Advanced 5 Channel Frequency Selective Monitoring for Analog Communications. The Power Communications Monitor provides the capability to constantly monitor and store user defined events that may be critical in properly maintaining and evaluating system communication issues and mis-operations for Power Line Carrier and Audio Tone protection systems.

Onsite Training. Our PLC training courses were designed with flexibility in mind and is typically provided at the customer"s own facility. This permits PowerComm Solutions" an opportunity to customize the course material specifically around the different manufacturers equipment each electric utility has in service and are most interested in training on.

Advancing Tunisia"s energy security and resilience by providing technical assistance and facilitating investment funding for the deployment of clean energy technologies resulting in increased clean energy generation capacity, reduced energy demand and consumption, and lower CO2 emissions.
