years, annual solar capacity additions quadrupled to 425 GW, but annual manufacturing capacity is set for a sixfold increase to more than 1 100 GW, a level that - if deployed in full - would be very close to the amounts needed in the NZE Scenario. There is a similar story of plentiful manufacturing capacity for lithium-ion

batteries.

Delta"s lithium-ion battery system is an excellent energy source with a long service life for 48 V and 51.2 V applications such as telecom and datacenters for power backup. It is a compact package with high energy density to save space and weight.
