Introduction. In 2017, the United States Virgin Islands (USVI) were impacted by two Category-5 hurricanes within a two-week period. On September 6th, Hurricane Irma made an indirect hit on St. Thomas (STT) and St. John (STJ); shortly afterward, Hurricane Maria made an indirect hit on St. Croix (STX) on September 20th (USVI Hurricane Recovery and Resilience Task Force 2018).

When the electric power system in the U.S. Virgin Islands is rebuilt, it will be stronger than it has ever been. The Virgin Islands Water and Power Authority, with help from the Federal Emergency Management Agency, plans to harden the power grid so it can withstand hurricanes with 200-mile-per-hour winds. Critical transmission lines will be placed underground.

On April 12, St. Croix took a significant step forward in public safety and emergency readiness with the groundbreaking of the new Charles "Tappy" Seales Fire Station and Multipurpose Center.
