When people think about solar panels, it is likely the rigid panel design that comes to mind.We see these on the southern exposure of rooftops or on massive solar farm installations. They are the very definition of durability and are typically installed in super sturdy brackets which can be angled to maximize solar gain throughout the year.

At Wickes Solar powered by Solar Fast, our warranty covers your panels for 30 years, but they can last for over 40. The biggest risk to solar panels come from damage or degradation. In the UK, we expect solar panels to have a medium degradation rate of 0.5% per year, so you"ve got a while before any problems will arise.

The mount lifts your solar panel to an optimum height and establishes an air gap between the panel and the surface. It helps establish a proper temperature so that the performance of solar panels isn"t compromised. Step 5: Solar battery installation. You"ve successfully mounted the solar panels on your roof.
