Saft"s new Intensium-Shift battery storage system: 30% more energy, lower footprint, maximizing renewable integration 11/05/2022 Saft energy storage system will smooth grid integration for Côte d"Ivoire"s first solar plant

The US industry installed 1,067MW of energy storage in Q4 2022, but just 48MW of those were categorised as commercial and industrial (C& I) or community-scale projects, according to a recent report from Wood ...

Recurrent Energy has closed US$513 million financing on a battery storage project in Arizona, US, which has a 20-year utility tolling agreement in place. Recurrent, the independent power producer (IPP) and developer subsidiary of Canadian Solar announced today that it has secured the funding for Papago Energy Storage, a 1,200MWh battery energy ...

The operating capacity of battery storage in the US grew by 7.9GW last year, bringing the country"s total cumulative installed base to 17GW by the end of 2023. The figures have been released by the American Clean Power Association (ACP) trade group, which published its annual report on statistics and trends in the solar PV, energy storage and ...

In August, it acquired Australian developer Akaysha Energy and committed AU$1 billion (US$675 million) to its battery storage buildout, covered by Energy-Storage.news at the time. It is also active in solar-plus ...

Several African countries have formally expressed interest to join the groundbreaking Battery Energy Storage Systems (BESS) Consortium, launched Saturday during COP28, which could revolutionise Africa"s energy landscape by developing advanced energy storage solutions through collaboration and innovation. Joining the BESS Consortium, a ...

Jirama, state utility in Madagascar, has announced plans to extend the capacity of the Ambatolampy solar PV power plant and add battery storage. The first utility scale solar power plant in the country, the ...

A flurry of big solar and storage project news in the US, with Pine Gate Renewables having a huge project approved in Oregon, Avantus signing a PPA for one in Arizona with utility APS and Arevon completing one in California. ... (SCA) for a 120MW/480MWh battery energy storage system (BESS) 6 December. News. Germany: Nofar Energy claims first ...

In the village of Satrokala in Madagascar, two renewable energy storage systems, supported by lead batteries, have been installed by Tozzi Green. A leading player in sustainable rural electrification, Tozzi Green"s installation in Madagascar ...

It marks the renewables asset manager"s first direct entry into the standalone BESS market, two months after it invested in storage-focused developer Delorean Power and two years after it bought the rights to a portfolio of behind-the-meter storage systems from Stem Inc. . The front-of-the-meter storage assets are both in New York and have a combined ...

The pilot project, which comprises 720 PV modules as well as batteries with a storage capacity of 315kWh, was installed by local energy group Henri Fraise Fils & Cie in partnership with the US ...

The passing of the Inflation Reduction Act in August of 2022 included provisions that are significantly impacting the utility-scale battery storage industry. This includes the decoupling of storage from solar projects, allowing ...

Several African countries have formally expressed interest to join the groundbreaking Battery Energy Storage Systems (BESS) Consortium, launched Saturday during COP28, which could revolutionise Africa"s energy ...

GuarantCo, part of the Private Infrastructure Development Group (PIDG), and African Guarantee Fund (AGF) have provided GreenYellow, with a credit guarantee of MGA 33 billion (c. EUR 7.1 ...

French utility company Engie has reached a deal, with an equity value of over $1bn, to purchase Texas-based battery energy storage firm Broad Reach Power.. The sellers were private equity firms EnCap and Apollo. This deal awaits clearances from anti-trust and energy regulatory agencies and is scheduled to close by the fourth quarter of this year.

Both states will retain 70% of the total battery network after project development is complete. Arizona (1.81GW), Nevada (1.13GW) and Florida (561MW) are other states with significant battery network capacity. Arizona will be the third-largest power battery user in the US once its 2.62GW pipeline completes development.
