Xpo energy Honduras

What type of energy is used in Honduras?
Solar photovoltaic (PV) energy followed at 18.9%,with wind powerat 12.9%,and geothermal energy at 5.8%. Due to the diversity of the Honduran landscape,the potential for wind development varies considerably. A 100 MW wind project was built in 2012.

Can Honduras generate electricity based on hydropower?
In Honduras,there is a large potentialfor electricity generation based on hydropower. In 2003 then President Ricardo Maduro put in place a Special Commission for the Development of Hydroelectric Projects. There are 16 new hydro projects that are expected to be commissioned before 2011,with an overall capacity of 206.5 MW.

Does Honduras have solar power?
Honduras has a large potential for solar photovoltaic generation. In fact,it is a practical solution for servicing energy-isolated rural communities. In 2007,there were about 5,000 individual Solar Home Systems,with an average size between 30 Wp and 50 Wp,which makes up for a total capacity of approximately 15 to 25 kW of power.

El Informe de Cobertura y Acceso a la Electricidad en Honduras (ICAEH-2022), es un documento elaborado anualmente por la SEN; tiene la finalidad de informar a la comunidad nacional e ...

The safest and most efficient way to transport oil and natural gas across our nation is through a system of underground pipelines. Unseen and often overlooked, pipelines are an integral part of our country"s energy ...
