Long-term averages provide a basic overview of solar resource availability and its seasonal variability. P50 value Best estimate or median value represents 50% probability of exceedance. For annual and monthly solar irradiation summaries it is close to average, since multiyear distribution of solar radiation resembles normal distribution.

Zambia has already embarked on large-scale solar energy production, with a 33 MW solar power plant inaugurated in February 2023 at Kitwe, in the Copperbelt province. The $200 million green bond programme, which has also attracted interest from local investors, is structured by Cygnum Capital, an investment company based in London, UK.
